Report of Trustees of State Lunatic Asylum,

FOR THE YEARS 1894-'95.

To the Legislature of the State of Mississippi:

In accordance with Section 2828 of the Code, the Trustees of the Mississippi State Lunatic Asylum beg leave to make the following report, detailing, as nearly as possible, the operations of said Institution for the past two years.

Upon application properly made, we have received all persons adjudged insane into this Asylum, and can vouch for the care and good treatment accorded them, and although at times our buildings were taxed to almost their fullest capacity, the unfortunate inmates, who by reason of accidents or other ills of life, were confined therein, have been made comfortable and treated with marked kindness by our able Superintendent, Dr. Mitchell, and his valuable Assistants, Drs. Stewart and Turner.

The corps of physicians will present to your honorable body their own report, showing admissions, discharges, etc., to which your attention is directed.

Whilst the former Legislature, with a commendable spirit of liberality towards this noble eleemosynary Institution, allowed us a maximum of \$120.00 per capita for the support, and notwithstanding we have been compelled to expend a large amount of this fund for necessary improvements (an approximate statement accompanies this report; see Exhibit A.), our per capita expenditures for the two years reached only \$112.47, and we cover back into the State Treasury a balance of \$11,148.45 (See Exhibit B, for quarterly expenditures and aggregate amount.) Statistics from similar Institutions show that our disbursements per capita are as small as those of any well-regulated Asylum, and much smaller than those of a great many. This end has been attained by the closest economy in all Departments, by securing our supplies from the best markets, by inviting bids from competitors in the different lines of trade, and by the good management of our tried Steward, Mr. R. F. McGill, who for so many years has filled this responsible posi-

tion with credit to himself and to the entire satisfaction of the Board.

The Mississippi State Lunatic Asylum has now been in existence just forty years; starting out with a few patients it has grown to enormous proportions, reaching at times 800 patients under treatment.

The decay and wear and tear of time require constant repairs, and to meet present conditions, alterations, larger accommodations and new and modern fixtures and apparatus become necessary. We can safely assert that our Asylum of to-day, presents a finer appearance and is in better condition than it ever has been; it is supplied with better appliances for the comfort of the patients, it affords our medical corps more enlarged facilities to protect the health of their wards; and it is in every respect a proud monument to Mississippi. The thanks of the afflicted may well be showered on the representatives of the people who have always provided so liberally for them.

In this connection we would most respectfully recommend a specific appropriation of not less than \$8,000.00 for the purpose of erecting an Infirmary; on hygienic principles alone you will see the necessity for such a building, and we are informed that all Asylums of any size are provided with a means of separating the sick from the well patients.

In our judgment, the appropriation for support should be at least as much as that for the past two years, (to-wit: \$120.00 per capita).

It is reasonable to expect larger expenditures for the next two years on account of higher prices for all lines of supplies, and a probability of an increased number of patients. Writers on Lunacy state that the malady is on the increase everywhere, and Mississippi can hardly expect to be an exception to the rule.

Your Trustees do not wish to be self-laudatory, but will say in all candor, that they have tried to fulfill the behest of the Legislature, and have performed the duties imposed upon them to the best of their abilities, and they are satisfied that an inspection of their work will justify the assertion that the wishes of your honorable body have been faithfully performed.

We cheerfully attest the great efficiency and conscientious discharge of duty of all the employees now under the control of our Superintendent and this Board; where all have done so well it would be a difficult task to single out for personal mention.

To His Excellency, the Governor (ex-officio President of this Board), we desire to express our heartfelt thanks for able advice and personal assistance so bountifully bestowed

upon us, and to express our keen appreciation for uniform kindness extended to us. His devotion to the cause of suffering humanity will ever be gratefully acknowledged. The Mississippi State Lunatic Asylum has been especially the recipient of much beneficence at his hands.

We deplore the loss of our friend and colaborer, Gen'l G. Y. Freeman, who died in May last. In the death of General Freeman the Asylum lost one of its noblest sympathizers, and the Board a true and valued member, and the State a faithful and able public servant.

This vacancy was filled by the appointment of Mr. E. Virden.

Respectfully submitted,

ISYDORE STRAUSS,
J. B. HARRIS,
MARCELLUS GREEN,
JAMES TRIPP,
E. VIRDEN,
Trustees.

REPORT OF THE SUPERINTENDENT.

To the Board of Trustees of the Mississippi State Lunatic Asylum :

GENTLEMEN—In accordance with the requirements of law, I now present my Ninth Biennial Report for your reviewal and trust that the operations of the Institution for this period may meet with your approval.

By reference to the annexed tables you can appreciate the movement of population for the biennial period of 1894 and 1895, together with the statistics of the Asylum from its incipency.

From the report of 1894 you will see that at the beginning of the year there were present 632 patients, of whom there were white males 154, white females 196 ; colored males 136, colored females 146.

Admitted during the year 284, of whom there were white males 62, white females 84 ; colored males 70, colored females 68 ; total present during the year 916 ; and of this number there were white males 216, white females 270 ; colored males 206, colored females 214.

Discharged recovered 101 ; white males 19, white females 40 ; colored males 20, colored females 22 ; discharged improved 4 ; white males 1, white females 1 ; colored males 0, colored females 2. Discharged unimproved 13 ; white males 3, white females 5 ; colored males 2, colored females 3. Discharged not insane 7 ; white males 4, white females 2 ; colored males 1, colored females 0. Discharged eloped 1 ; white male 1, white females 0 ; colored males 0, colored females 0. Died 74 ; white males 16, white females 18 ; colored males 21, colored females 19. Remaining at the end of the year 716 ; white males 172, white females 214 ; colored males 162, colored females 168 ; daily average 706.956.

At the beginning of the year 1895 there were 716 patients ; white males 172, white females 214 ; colored males 162, colored females 168. Admitted in the year 258 ; white males 78, white females 56 ; colored males 63, colored females 61. Total present 974 ; white males 250, white females 270 ; colored males 225, colored females 229. Discharged recovered 129 ; white males 31, white females 37 ; colored males 32,

colored females 29. Discharged improved 4; white males 3, white females 0; colored males 0, colored female 1. Discharged unimproved 14; white males 5, white females 8; colored males 0, colored female 1. Discharged not insane 8; white males 7, white females 1; colored males 0, colored females 0. Discharged eloped, none. Died 68; white males 18, white females 15; colored males 19, colored females 16. Remaining at the end of the year 751; white males 186, white females 209; colored males 174, colored females 182. Daily average 774.047.

Inasmuch as this report concludes the fourth decade in the history of this Institution, have deemed it not improper to recall to you the names and official tenure of the various Superintendents of this Institution since its inauguration in January, 1855, when Dr. W. S. Langley, a prominent and skillful physician, was selected as its first Superintendent, which position he filled most satisfactorily for about three years, when he resigned in deference to the demands of his private interests. Immediately succeeding Dr. Langley was Dr. W. B. Williamson, also a prominent and skilled physician, but after a satisfactory service of one year resigned, being succeeded by Dr. Robert Kells, and although not generally known throughout the State at the time of his appointment, gave a most satisfactory service, holding the position about six years, when he was succeeded by Dr. A. B. Cabaniss, of Jackson, a physician of ability, but owing to his inability to subscribe to the iron-clad oath, was removed by the military Governor after a service of about three years, and was succeeded by Dr. W. Deason, a military appointee, whose term of service was limited to about one year. His successor was Dr. W. M. Compton, a gifted man, and whose term of service lasted eight years, when the present incumbent was appointed by Governor Stone as his successor in 1878, which position he has held by the grace of Governors Stone and Lowry up to the present time.

Without your counsel and sympathy, coupled with that of the State Executive, I should have been frequently at a loss to steer clear of mistakes, which were avoided alone by my desire to accept most willingly the advice sought from you and the Governors. Although autocratic power in Institutions of this kind is almost indispensable to proper discipline, I congratulate myself that I have never exercised it to the prejudice of either patient or employee; and have never undertaken any important change, even when authorized by law, without a free interchange of views both with the Governors and yourselves.

My official experience has taught me the importance of harmony between executive officers and their counsellors, for

without perfect unity of action, disappointment will be inevitable, and in institutions of this kind will react to the prejudice of untold numbers, thereby measurably defeating the good that should spring from so large an expenditure in public charities.

While many complaints have been preferred against the liberality of Legislatures, confess with pleasure that this Institution has been treated most kindly, as we have rarely asked for an appropriation for its maintenance, when disappointment followed, and judging from the past feel assured that the incoming Legislature will continue to treat us as liberally as the State's financial condition will allow.

We fully appreciate the fact that our people have been in straitened circumstances for the past few years, for which no blame attaches to them, as a combination of inauspicious influences have wrought this mighty change in their pecuniary condition, but the star of hope is now above the horizon, which I trust may soon bring forth such prosperity that may justly call forth the admiration of other nations when shown the reactive power inherent in the South, and especially Mississippi, whose lands are now claiming such marked attention from the landseekers, our brethren from the West.

Although our "wants" are growing less every year, we will always have a few to present for the consideration of the Legislature, which if supported by your usual zeal in behalf of this Institution, will probably be secured. We greatly need an infirmary for the better care of the sick, and more especially for those affected with consumption and its allied diseases, which greatly swell our mortality tables; in fact could this disease be stamped out, our mortality tables would show but few recruits from year to year, but as all authorities recognize the contagious nature of this disease, we can hope for no improvement until some form of isolation is adopted which in the end might spare many victims from the assaults of this foe, which is more dreaded and reaps a richer harvest than almost any other morbid affection known to the profession, hence we should by all means spare no effort to eliminate this insidious and fatal disease from our death-roll.

The insane are much more liable to tuberculosis than other classes, and for this reason the best sanitation and surroundings should be secured for their comfort and health. I have several times suggested through you to the legislature the many victims from this terrible malady, but each year of my observation demonstrates the great necessity for isolating all the sick, the importance of which I now feel it my duty to emphasize in the present manner, and trust your co-opera-

tion will be secured to aid in this indispensable improvement.

In addition to an appropriation for this purpose, we do not feel justified in asking for a maintenance appropriation of less than one hundred and twenty dollars per capita, as supplies are already advancing, and before the expiration of the biennial period will reach former prices.

We now have fine water furnished by the Water Works Co., which we think presents no latent or apparent source of disease, and with our unchallenged location for health, believe we could make this place an ideal spot for an institution of this kind by the expenditure of a few thousand dollars, which amount would not, in our judgment, embarrass the appropriation for other educational and charitable institutions.

We congratulate the patrons and patients that no epidemic disease has invaded our wards for the past biennial period, save that of measles during the present year, from which there was but one death.

By reference to the tables you will find that our death rate was larger than usual in 1894, influenced, in our judgment, by racial, tubercular, and epileptic causes, but the present year has given us better results both as regards deaths and recoveries. Our population is now almost equally divided between the whites and colored, which fact is an important factor in bringing about untoward results, as statistics in the South recognize that the mortality among the negroes is from twenty-five to forty per cent. in excess of the whites, and while this difference does not obtain under the same sanitary surroundings, it is a well established fact that when placed under equally as favored conditions, the percentage of deaths greatly exceeds those among the whites, which truth is demonstrated very clearly in the tables before you.

Unfortunately, the year 1894 was ushered in by the suicide of a male patient resulting from a fall from a window of the third story of the building. A coroner's inquest was held which resulted in exonerating the attendants on the ward as well as the officers of the institution. Unfortunately for the party, a small box was left in his room, and by securing a piece from the same, was enabled to break the cast-iron guard, and when this was accomplished precipitated himself from the window, resulting in instantaneous death. Considering the insecurity of our window guards, we have been extremely fortunate that so few accidents have occurred during my administrative period, being limited to four or five.

During the year 1894 there was appropriated for maintenance \$84,834.72, out of which was expended \$84,279.94,

leaving \$554.78 to be covered back into the treasury. As all supplies were extremely low, the Trustees in this fiscal year, discovering that there would be ample means, deemed it wise to make many necessary improvements and repairs on the out-buildings, and in addition placed an electric plant of six hundred and fifty lights of sixteen candle power, with which to supply all buildings connected with the Asylum, believing that their action would be approved by the Legislature. This plant, however, was authorized by the Board of Public Contracts on petition of the Trustees, and the safety arising from this improvement justifies the wisdom of their course, since electricity gives comparative security against the ravages of fire, and at the same time furnishes an admirable light. For the exact cost of these extraordinary improvements, you are referred to the report of the Steward. The plant was erected about seven months ago, and with rare exceptions has been operated most satisfactorily.

During this year, as supplies for maintenance were cheap, the Trustees felt justified in making many necessary repairs, among which was the remodeling of the laundry, which became necessary on account of the large increase in the number of inmates within the past four years.

Our lunacy laws are very crude and should be remodeled, as they have sections inconsistent both in spirit and letter, leading frequently to great embarrassment as they are susceptible of almost any construction that one may be inclined to give. One section states that, "Mere idiots, fools, and known incurables, who are not dangerous, shall not be admitted into the asylums," while another section makes it mandatory on the Superintendent to receive all parties ordered in by a jury of inquest, although many cases excluded by the Code are embraced in the inquisition. On account of these inconsistencies we are forced to admit all cases regardless of what we conceive to be a proper construction of the law. The result of these imperfections places with us many cases of senile decay, together with idiots and all kinds of chronic mental ailments, which are now crowding the institution, and give us no hope of amendment, but on the contrary many who might have been cared for at home, are, by the fatigue of the movement, at the portals of death when they reach us, and often die in a few days after admission. If this indiscriminate mode of admission continues for six months, both asylums will be filled and leave no room for acute cases, many of which might be relieved by early and judicious treatment. It will be necessary for the present Legislature to look to the necessity for enlargement for the accommodation of the insane, as neither institution will have a spare bed twelve months hence, which condition will

be most unfortunate as the county jails will certainly be their abiding place, giving no hope for relief to the afflicted, but an early death will in this condition give relief to friends, seeing no chance for relief in these squalid prisons, where criminal companions will be their chief associates. Other State demands can, to a certain extent, be postponed for a short time without compromising progress, but if the insane are at large they constitute a constant menace to society, which can only be abated by confinement in prisons. While we have no personal interest in these enlargements, we are expected and required by law to keep the Legislature thoroughly advised as to all needs incident to this department. Were we disposed to consult our own interest and comfort, would not suggest enlargements, for in proportion to increased duty and responsibility, has the pay of the Superintendent been reduced.

Our farm products this year have given a fairly good yield, and as regards the production of corn, has exceeded greatly any year since my incumbency. Sweet potatoes—a crop which is indispensable to the comfort of the patients—have also turned out well, notwithstanding the extremely dry fall. Our oats were poor, as the extremely cold winter killed those planted in the fall, necessitating a spring planting which accounts for the short crop when compared with other years.

Our garden products, as usual have been good, but due to dry weather, I fear that our expectations for a winter garden may be disappointing.

The dairy products have given us a liberal supply of milk for the sick, and when churned the butter-milk yield gives great comfort to the inmates. We have now a hundred of high-grade Jerseys, but as pasturage is too limited, have suggested to the Board to deplete the herd, which will be done soon.

We have now, including all ages, about ninety or a hundred high-grade Berkshires, which promise a good yield of pork for the present winter. Last year—the first time in the history of the Institution—cholera invaded the herd, from which disease many were lost, the result of which was that our pork product was greatly reduced the last winter.

Before closing our report we must acknowledge our renewed obligations to the following journals, whose weekly advent gives pleasure to many; of this number are the following, viz: Vicksburg Commercial-Herald, Clarion-Ledger, Meridian News, Subsoiler and Democrat, Brookhaven Leader, Pascagoula Democrat-Star, Natchez Democrat, Ellisville New South, New Orleans Deutsch Zeitung, Jasper County Review, Deaf Mute Voice, Brandon News, Cartha-

ginian, Bolton News, Macon Sun, Yazoo City Herald, Greenville Times, Port Gibson Reveille and Westville News.

This is my fifth report during Governor Stone's different administrations, and am gratified to say, that not only this Institution is placed under many obligations to him for his watchful care and zealous interest in behalf of the insane, but personally I am pleased to say, that nothing I can do or say, can cancel the obligations due for many evidences of confidence and friendship.

Since our last report we are pained to chronicle the death of one of our Trustees, Gen'l G. Y. Freeman, which took place suddenly last spring, the result of a pulmonary hemorrhage. Just in the prime of life and full of aspirations, he was called hence to a higher tribunal, which we trust he met with a consciousness of having acquitted himself after the order of the golden rule towards his fellow man. Without a foe, with a large coterie of devoted friends, he spent his life, contributing pleasure, and never pain, to those whom he knew, and as an official of this Institution was exceedingly liberal in his views, and ready at all times to do that which the pleasure and comfort of the inmates demanded. We miss him greatly, and his memory will be cherished by the officers of this place. He was succeeded by Mr. E. Virden, a former Trustee, whose appointment meets with great favor by all.

In the report of the Steward you will find an itemized account for the past biennial period. Capt. R. F. McGill has been identified with this place as Steward almost all the time since its inception, and by strict integrity commands the confidence of all who know him.

By reference to the Matron's report you will find a list of clothing made and distributed during the period embraced in this report.

We have two young men, viz: Drs. Nolan Stewart and O. M. Turner, the former as first and the latter as second assistant, and am pleased to note that both are accomplished in their profession, and are admirably suited for the discharge of the varied duties incident to the demands of this place.

To you, gentlemen, it affords me pleasure to state that you have given faithful and efficient service to the Institution with which you are connected, and in addition am gratified to say that our intercourse has been most agreeable and harmonious.

I am also indebted to the various attendants and employes for courtesies, and believe in the main they have acquitted themselves with fidelity to duty.

In conclusion, let me assure you, gentlemen, that not only myself, but the medical staff and employes recognize your general courteous manner to each and all.

Respectfully submitted,

T. J. MITCHELL, Supt.
